

LISTING OF CLAIMS

Claims 1-19. (Cancelled)

Claim 20. (Original) A MEMS device, comprising:

a fixing part fixed to a substrate;

a driving part connected to the fixing part by a connecting part and floating over the substrate;

an electrode part for driving the driving part; and

contact parts selectively switchable with the driving part, wherein the electrode part and the contact parts are planarized on the substrate.

Claim 21. (Original) The MEMS device as claimed in claim 20, wherein the electrode part includes an electrode and an insulation layer covering the electrode to electrically isolate the driving part and the electrode, the electrode being embedded in the insulation layer.

Claim 22. (Original) The MEMS device as claimed in claim 20, further comprising:

an anchor inserted between the fixing part and the substrate for fixing the fixing part on the substrate; and

sidewalls on at least a portion of side surfaces of the anchor.

Claim 23. (Original) The MEMS device as claimed in claim 20, wherein the sidewalls are substantially formed over the entire portion remaining except for a portion corresponding to a connection part connecting the fixing part and the driving part.

Claim 24. (Original) The MEMS device as claimed in claim 20, wherein a width of the connection part is narrower than that of the fixing part.

Claim 25. (Original) The MEMS device as claimed in claim 22, wherein the sidewalls, fixing part, and driving part are integrally formed in one body.

Claim 26. (Original) The MEMS device as claimed in claim 25, wherein the sidewalls are in contact with the substrate.
